The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

Detailed Action

Response to Amendment

1. Applicant's remarks/arguments filed on 11/1/2005 regarding claims 1, 3, 4, 6 have been considered. Claims 1, 3, 4, 6 are currently pending and claims 2, 5 have been canceled by applicant.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a communication apparatus for performing asynchronous communication with a base station, including the unique functions of:

"a receiving device for receiving a down link signal, which is transmitted from the base station and in which a division signal is inserted for each of constant time intervals; wherein each of said constant time intervals is divided into a plurality of predetermined time intervals; and wherein said detecting device calculates a correlation between a signal correlated with the division signal and the received down link signal for each of the predetermined time intervals, and compares the calculated correlation with a predetermined threshold value for each of the predetermined time intervals."

The closet prior art, Higuchi et al. (EP 0,825,737 A1), discloses a long code synchronized phase detector for receiving a spread modulation input signal in which a long code is inserted for each of long code period, and that the mobile station detects the correlation between the received signal and a code obtained by multiplying the long code and short code for each of the long code

Application/Control Number: 09/658,877

Art Unit: 2664

period in order to identify the types of the received long code and the maximum correlation value of the long code. However, Higuchi fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Mew whose telephone number is 571-272-3141. The examiner can normally be reached on 9:00 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wellington Chin can be reached on 571-272-3134. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
